HustlerTech

CONFIDENTIAL PROPOSAL • KES

SENTINEL GRID™

Next-Generation AI Video Surveillance & Centralized Operations Platform

Transform your existing CCTV infrastructure across all branches into an autonomous, proactive security command center with sub-second live video, 24/7 hardware telemetry, and real-time AI safety detection.

Hustler Technologies / OmSystems
Enterprise Video Intelligence Division

Currency: KES (Kenyan Shillings)
Ready for Commercial Evaluation

1. Executive Summary & Business Impact

Modern multi-branch enterprises face serious operational vulnerabilities: blind spots, undetected camera or hard disk failures, high security guard turnover, and massive liability risks from safety violations. Conventional CCTV installations are purely **passive recording devices**—incidents are only analyzed days after damage or theft has already occurred, and crucial video footage is frequently discovered missing due to unmonitored hard drive corruption.

> **The Sentinel Grid™ Core Advantage:** Sentinel Grid transforms any standard CCTV infrastructure (Hikvision, Dahua, CP PLUS, or any ONVIF/RTSP camera) into an **intelligent, proactive, and centralized surveillance command center** without replacing a single existing camera.

Traditional CCTV vs. Sentinel Grid™ Comparison

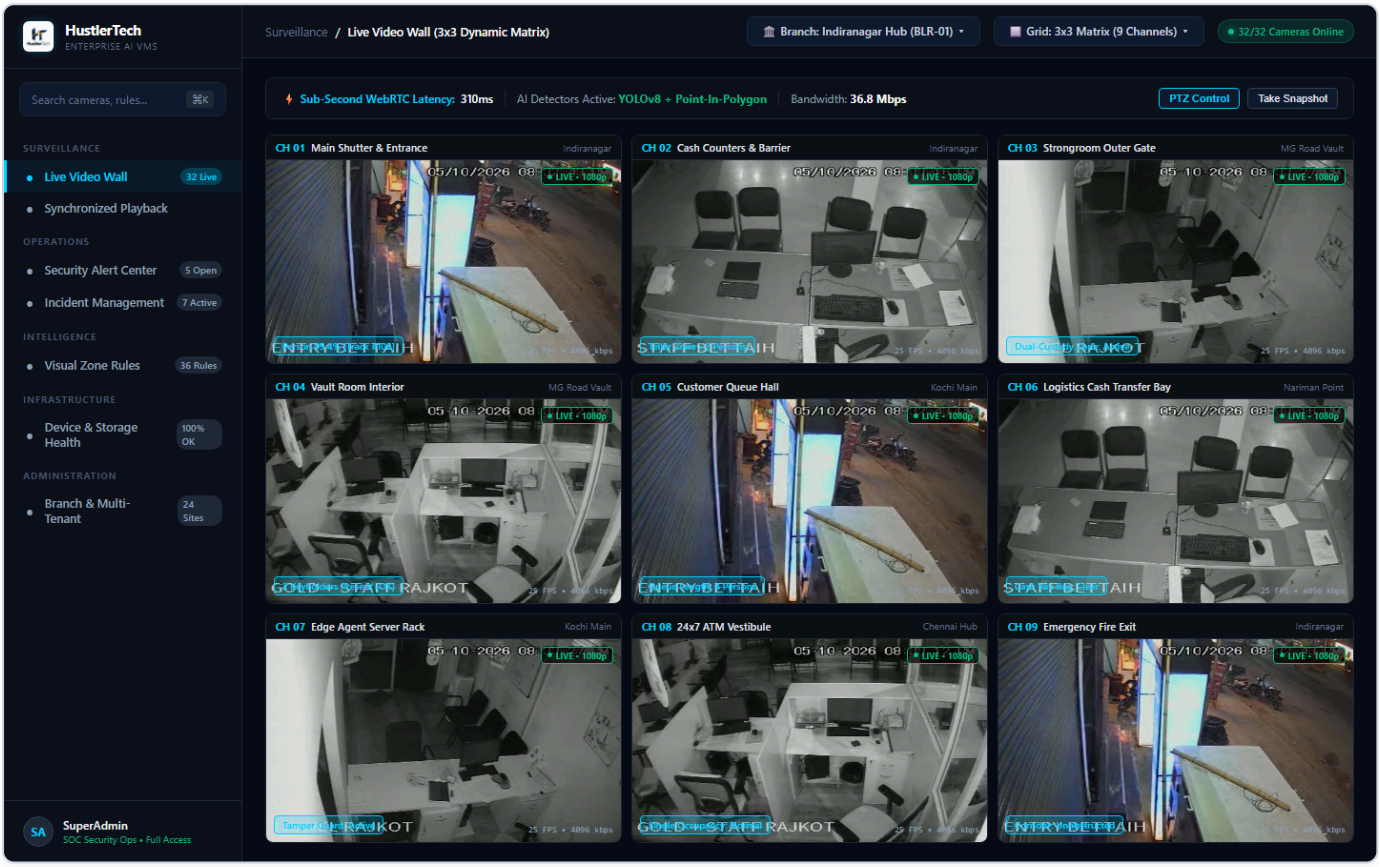

CHALLENGE	LEGACY CCTV SYSTEMS	SENTINEL GRID™ PLATFORM
Hardware & Disk Failures	Silent failures. Discovered only when police or auditors ask for footage that was never recorded.	**24/7 S.M.A.R.T. Health Telemetry:** Predictive alerts on HDD bad sectors, lens dirt, tamper, and signal drops.
Multi-Branch Monitoring	Guards must log in to fragmented DVRs individually. Physically impossible to watch 10+ sites.	**Single-Glass-Pane Command Wall:** Monitor 10 to 400+ branches simultaneously from any web browser.
Incident Detection Time	Hours or days after the crime occurs (100% reactive).	**Sub-30-Second AI Detection:** Real-time alerts for helmet violations, intrusion, after-hours presence.
Storage & Retention Compliance	Unmonitored rolling overwrites causing severe regulatory or insurance audit penalties.	**Visual Retention Guard:** Continuous tracking of 30/60/90-day retention with bright red violation indicators.
Emergency Escalation	Manual phone calls after incident is noticed.	**4-Tier Automated Dispatch:** Instant onscreen popup, sirens, automated telephone calls, SMS, and email.

2. Product Architecture & Visual Walkthrough

MODULE 01 • SURVEILLANCE

Centralized Live Video Wall & WebRTC Low-Latency Streaming

Stream live video from distributed branches with ultra-low latency (300–800ms) directly inside any standard web browser without installing slow desktop plugins or active-x controls.

High-Density Matrix (1 to 36 Grids)

Switch dynamically between single camera focus and 4, 9, 16, 25, or 36 camera grids across multiple branches.

Bandwidth-Adaptive Streaming

Intelligently serves high-definition main streams or low-bandwidth sub-streams based on internet speeds.

MODULE 02 • FORENSICS & INVESTIGATION

Synchronized Multi-Camera Playback & Instant Evidence Export

Eliminate investigation blind spots by scrubbing through 4 synchronized camera feeds simultaneously with millisecond timestamp precision.

Multi-Angle Timeline Scrubbing

Review events from entry, cash counter, and exit angles simultaneously at 0.25x slow-motion up to 4x fast scan.

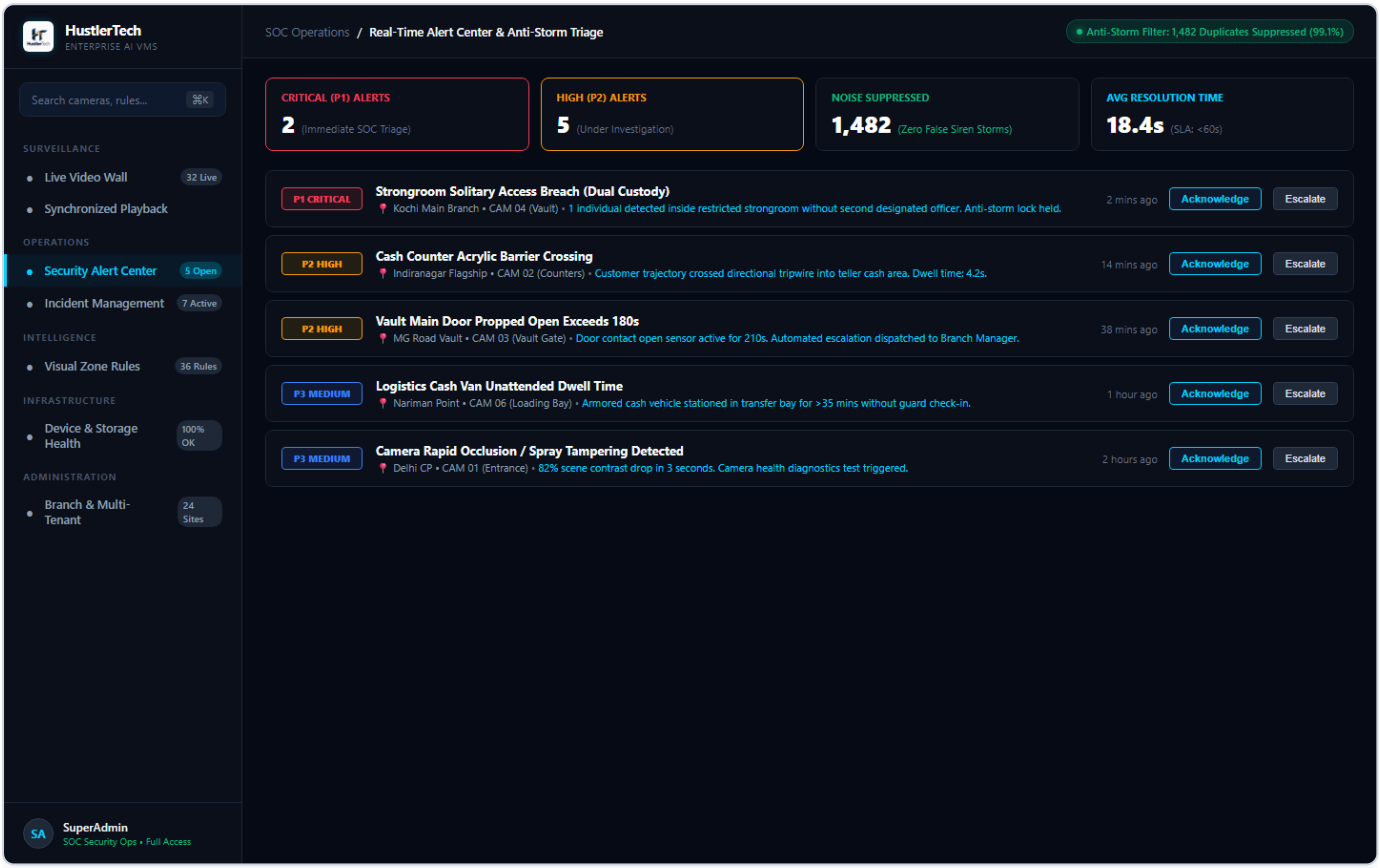

Tamper-Proof Video Export

Download cryptographically signed MP4 video clips with verified timestamps ready for legal and police audits.

MODULE 03 • RESPONSE AUTOMATION

Proactive Alert Operations & 4-Tier Automated Escalation

Eliminate alarm fatigue with strict P1 to P4 prioritization and automated emergency dispatch across SMS, phone calls, and email.

P1 to P4 Intelligent Escalation

P1 Critical triggers immediate onscreen flashing popups, siren audio, automated voice phone calls, and SMS to guards.

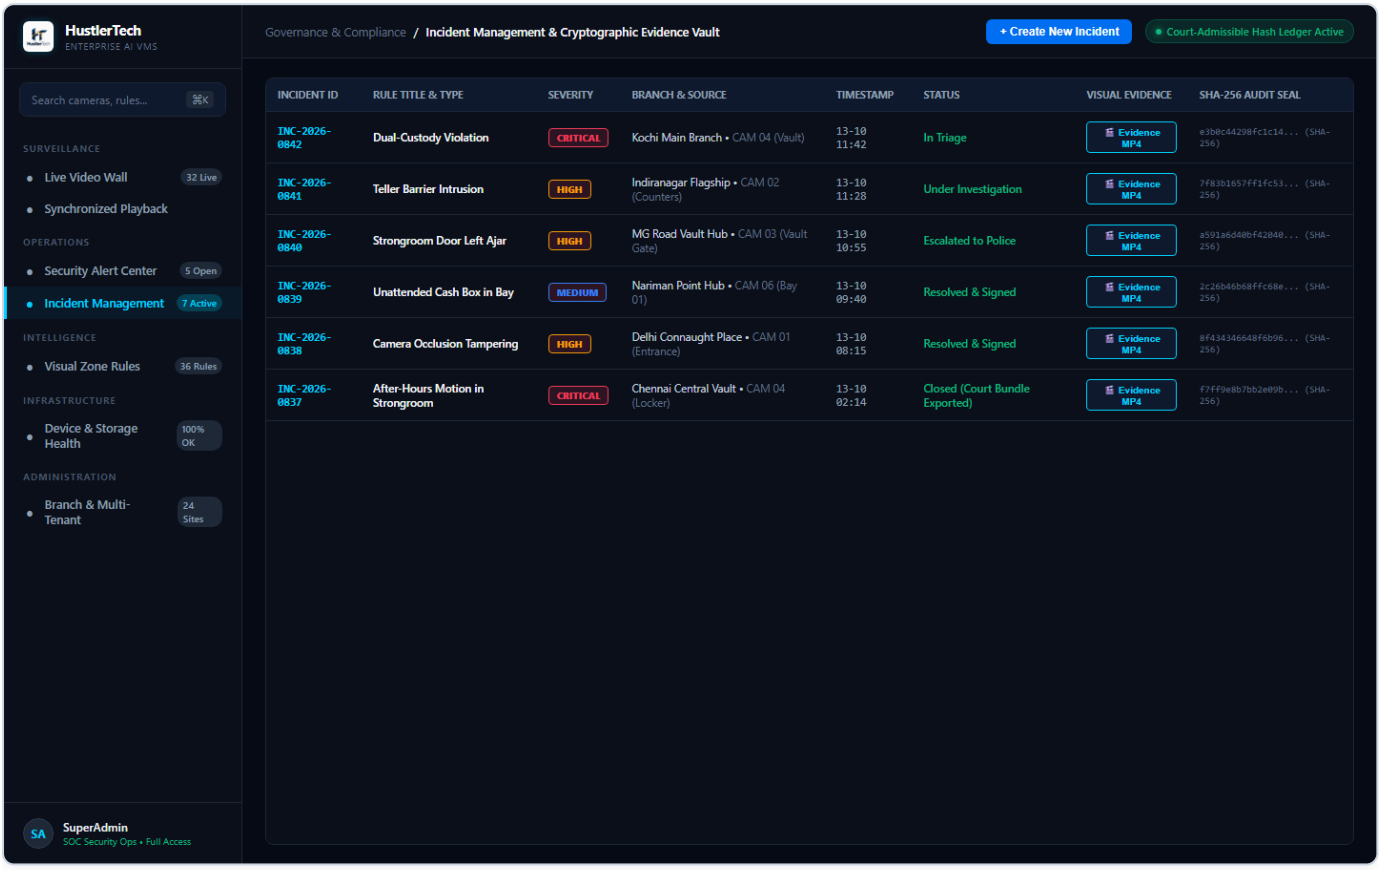

1-Click Instant Video Popup

Clicking any incoming alert instantly renders the live video feed alongside pre-event and post-event snapshot clips.

MODULE 04 • GOVERNANCE

Incident Lifecycle Management & Evidence Security

Standard operating procedure (SOP) enforcement ensuring full accountability for every acknowledged security event.

Evidence Locking Protection

Locks critical video evidence to prevent automatic deletion by rolling storage retention cycles.

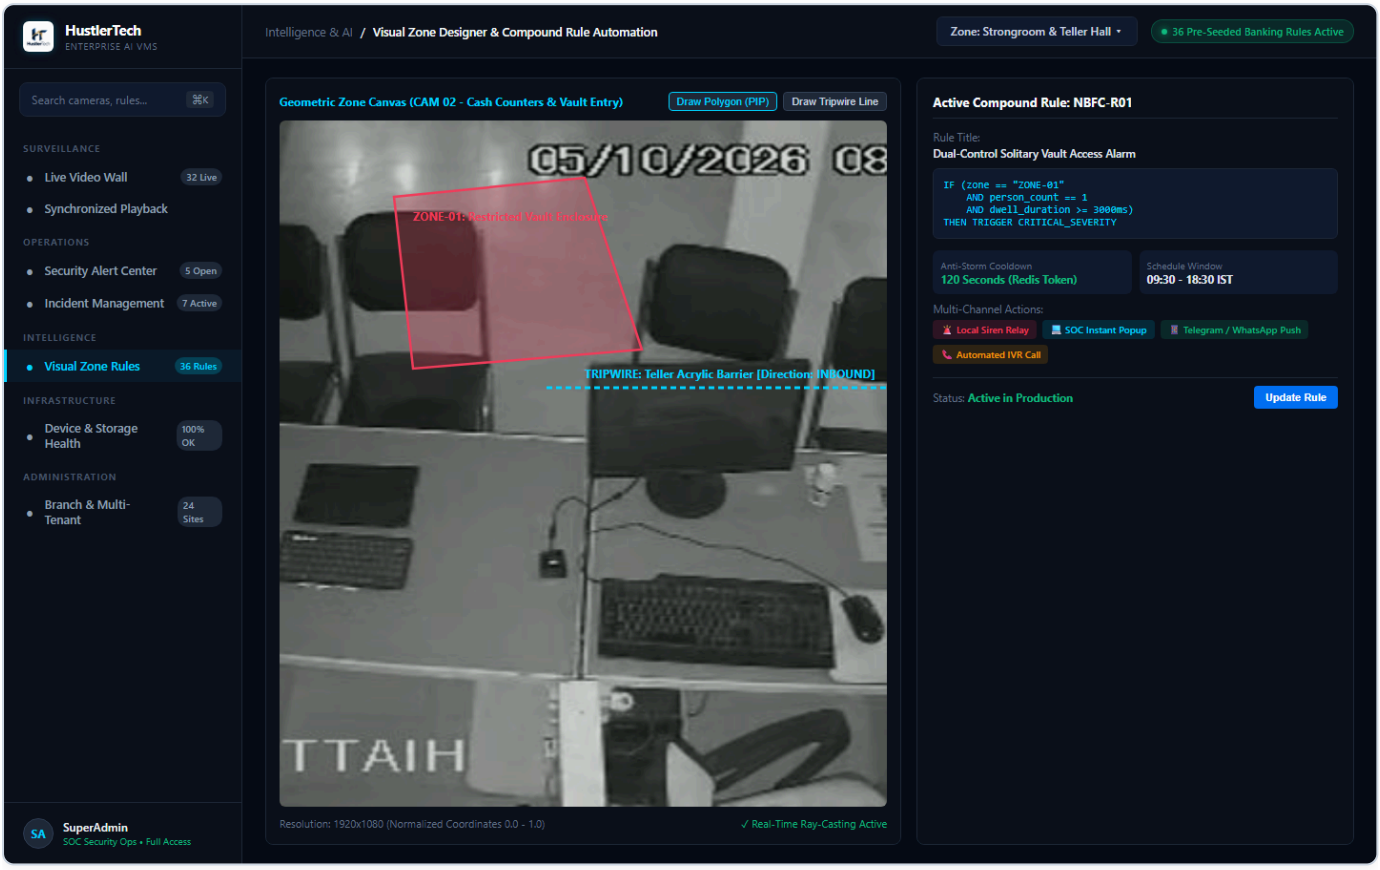

Immutable Digital Audit Log

Every camera view, playback session, alert dismissal, and clip download is permanently recorded with user ID and timestamp.

MODULE 05 • COMPUTER VISION

Enterprise AI Analytics: Helmet, PPE, Intrusion & Vault Safety

High-precision edge and server AI vision algorithms calibrated for industrial sites, retail networks, fuel stations, and financial branches.

Helmet & PPE Compliance

Real-time detection of missing helmets and safety gear on personnel and riders (field-tested across live commercial sites).

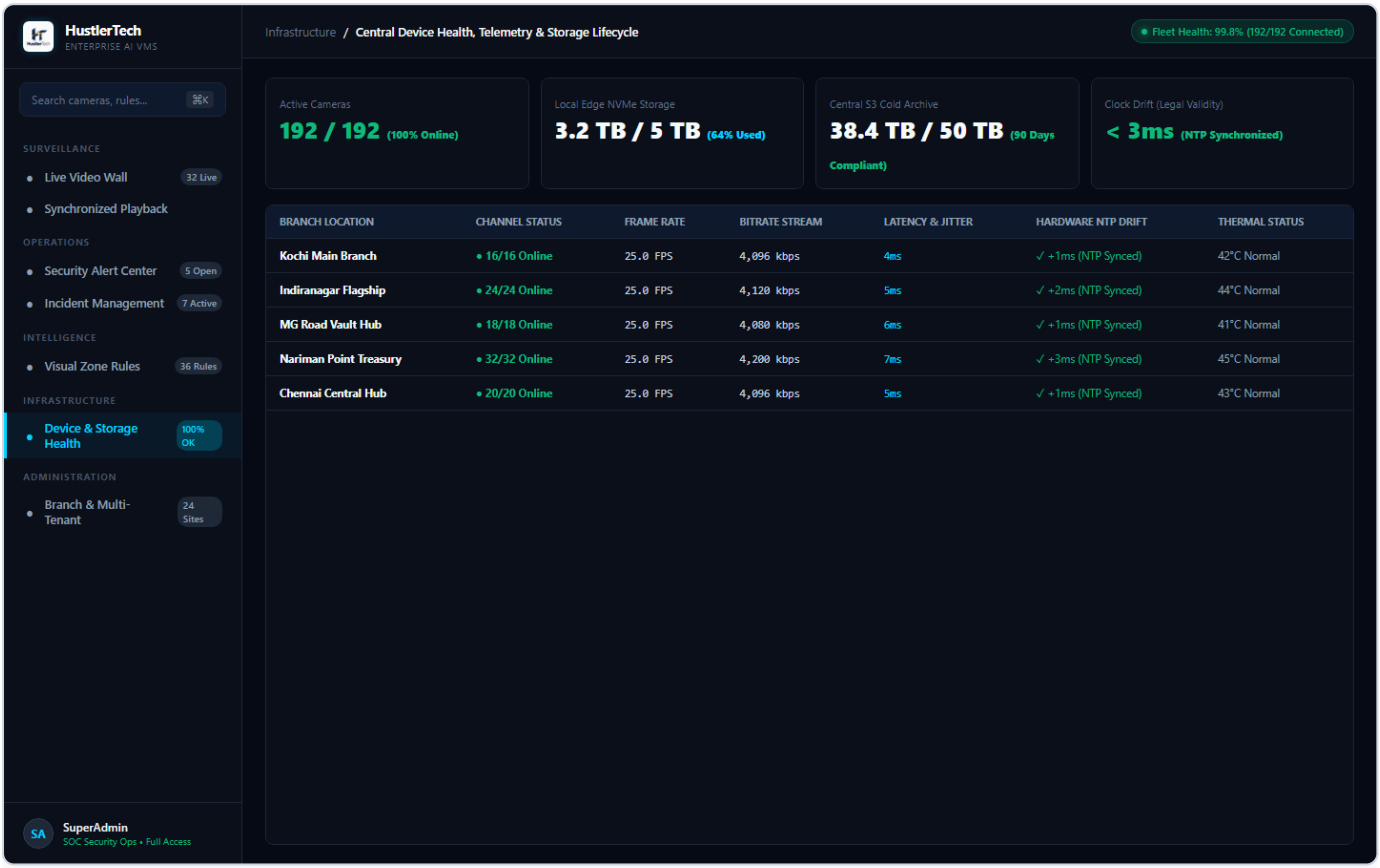

Banking & High-Value Zone Rules

Vault dual-control detection, after-hours presence, teller queue dwell times, and perimeter virtual tripwires.

MODULE 06 • TELEMETRY & MAINTENANCE

24/7 Hardware Diagnostics & Retention Compliance Guard

Proactively monitor hard disk health, lens cleanliness, video tampering, and regulatory recording storage requirements.

S.M.A.R.T. HDD Failure Warnings

Detect bad sectors and hard drive degradation days before total disk crash to prevent footage loss.

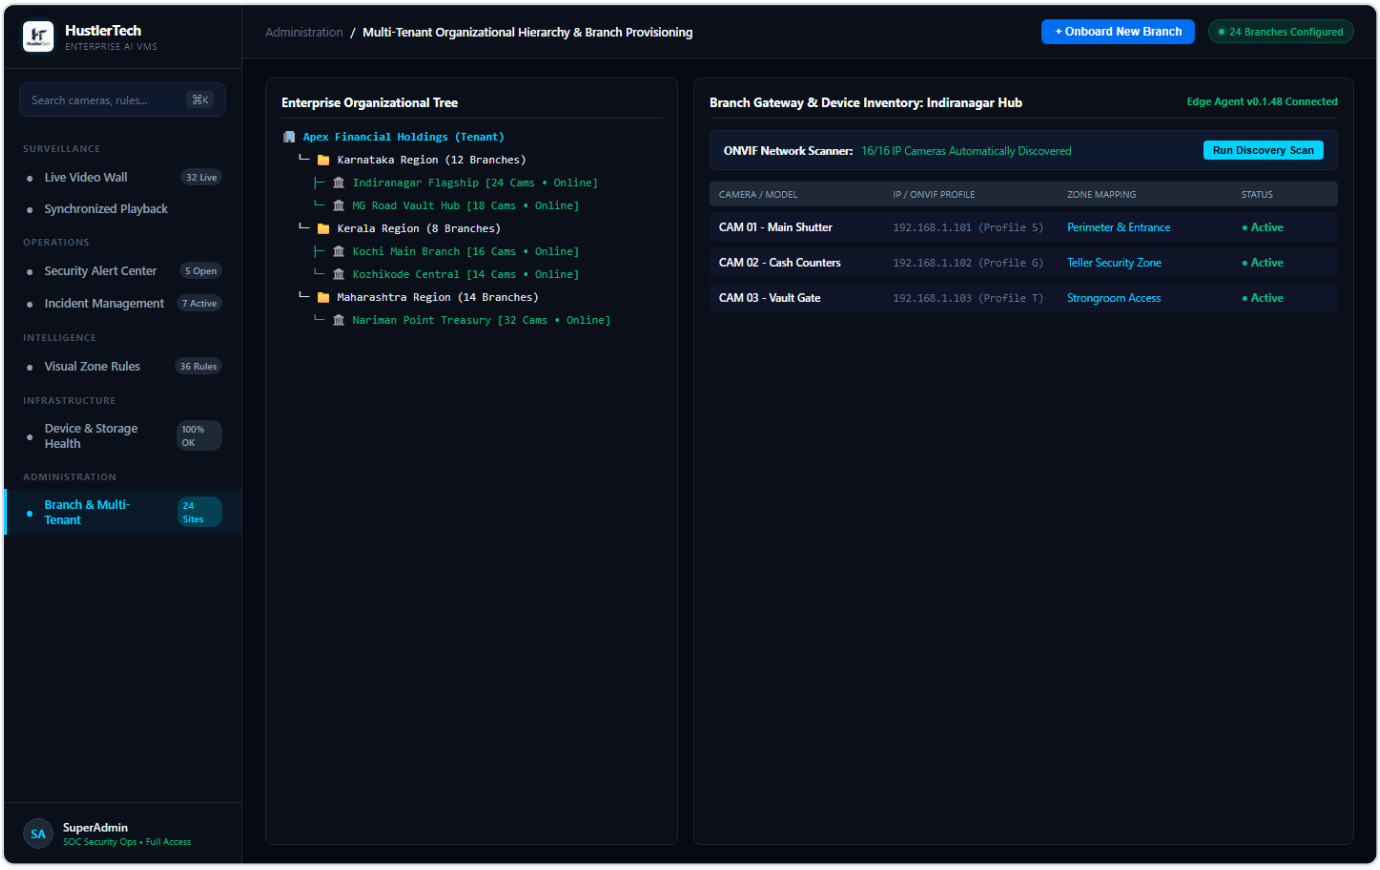

Regulatory Retention Monitor

Visual tracking of mandatory 30/60/90-day storage compliance with bright red alerts for any retention shortfall.

MODULE 07 • ENTERPRISE ADMINISTRATION

Multi-Branch & Role-Based Access Control (RBAC)

Centrally govern operations across 10 to 400+ branches with strict multi-tenant isolation and automated report scheduling.

3. Commercial Proposal (Quoted in KES)

We provide two flexible financial models tailored to your organization's procurement preferences: **Model A: One-Time CapEx (Perpetual Ownership)** or **Model B: Recurring SaaS / OpEx (Zero Upfront Risk)**.

Model A: One-Time Investment (CapEx / Perpetual Platform Ownership)

ITEM / LICENSE	SCOPE & INCLUSIONS	PRICE (KES)
Core Server Platform License	Centralized Control Plane, Command Center Dashboard, PostgreSQL DB Schema, Multi-Branch RBAC, Automated Reporting Engine (Perpetual)	**KES 195,000** (One-Time)
VMS Channel License (Per Camera)	Live streaming, multi-camera synchronized playback, timeline scrubbing, browser PTZ control, and MP4 evidence export	**KES 3,500 – 4,500** / camera
Hardware Health & Retention Pack	Automated HDD S.M.A.R.T. diagnostics, camera tamper/offline alert, and 60/90-day retention compliance tracking	**KES 1,200** / camera

ITEM / LICENSE	SCOPE & INCLUSIONS	PRICE (KES)
Enterprise AI Analytics Pack	Choice of Helmet/PPE Safety Detection, Perimeter Intrusion, Line-Crossing, or Vault Monitoring	**KES 5,500 – 7,500** / AI camera
Implementation & Commissioning	Server deployment, media gateway setup, network optimization, and administrator handover training	**KES 75,000 – 120,000**
Branch Edge Agent Remote Setup	Remote connection and calibration of branch DVRs/NVRs to central command center	**KES 2,500** / branch
Annual Maintenance (From Year 2)	Software version updates, security patches, device firmware compatibility, priority support (Year 1 is 100% FREE)	**18% per annum**

Model B: Recurring Subscription (OpEx / Cloud & Hybrid SaaS in KES)

Eliminate upfront software capital expenses with a predictable, all-inclusive monthly subscription billed quarterly or annually.

Tier 1: Essential VMS

KES 280

per camera / month

- ✓ Live Video Wall (up to 36 grids)
- ✓ Synchronized Timeline Playback
- ✓ 24/7 Camera & HDD Health Telemetry
- ✓ Retention Days Compliance Guard
- ✓ Daily Downloadable PDF/Excel Reports
- ✓ Standard Technical Support

RECOMMENDED

Tier 2: Pro Smart VMS

KES 550

per camera / month

- ✓ **Everything in Essential VMS**
- ✓ Perimeter Intrusion & Tripwire AI
- ✓ After-Hours Human Presence Detection
- ✓ P1–P4 Multichannel Alert Dispatch
- ✓ 1-Click Live Video Popup with Clip
- ✓ 24/7 Priority Emergency Support

Tier 3: Enterprise AI

KES 850

per camera / month

- ✓ **Everything in Pro Smart VMS**
- ✓ **Helmet & PPE Compliance AI**
- ✓ Vault & Teller Dual-Control Rules
- ✓ Retail Footfall Heatmaps & Dwell Times
- ✓ Continuous Custom AI Retraining
- ✓ Dedicated Technical Account Manager

☁️ **Base Platform Cloud & Support Fee: KES 7,500 / month** per organization (covers dedicated cloud hosting, SSL security, automated database backups, WebRTC relay bandwidth, and unlimited user accounts).
Branch Activation: KES 1,500 / branch (one-time nominal setup fee).

3-Year Total Cost of Ownership (TCO) Comparison (100 Cameras / 25 Branches)

FINANCIAL DIMENSION	MODEL A: ONE-TIME CAPEX	MODEL B: RECURRING SAAS (OPEX)
Year 1 Upfront Investment	**KES 807,500 (Licenses + Setup)**	KES 37,500 (Branch Remote Setup)
Year 1 Recurring Cost	KES 0 (Warranty Included)	KES 750,000 (KES 550/cam + Cloud Fee)
Year 2 Recurring Cost	KES 145,000 (Optional 18% AMC)	KES 750,000
Year 3 Recurring Cost	KES 145,000 (Optional 18% AMC)	KES 750,000
Total 3-Year Investment	**KES 1,097,500**	**KES 2,287,500**
Accounting Benefit	Capital Asset (Depreciable over 3–5 years)	100% Tax-Deductible Operating Expense

4. Rapid 14-Day Implementation Roadmap

Phase 1: Days 1–3 • Network & Camera Audit
Audit existing NVRs/cameras (Hikvision, Dahua, CP PLUS, etc.), verify ONVIF/RTSP connectivity, and measure branch bandwidth capacity.

Phase 2: Days 4–7 • Pilot Branch Deployment
Deploy lightweight Edge Agent on 2–3 pilot branches, establish low-latency WebRTC streams, and verify S.M.A.R.T. HDD health telemetry.

Phase 3: Days 8–11 • AI Calibration & Alert Setup
Calibrate Helmet/PPE rules, define perimeter tripwires, configure P1–P4 escalation triggers, and test SMS, Email, and Phone notifications.

Phase 4: Days 12–14 • Fleet Rollout & Training
Onboard remaining branches, configure role-based permissions (RBAC) for branch managers and guards, and hand over the system.

5. Next Steps: Zero-Risk 7-Day Live Pilot

We invite your leadership to test Sentinel Grid™ on **2 to 3 representative branches** for 7 days with zero disruption to your daily operations:

1. **Confirm 2–3 test locations** with existing IP cameras or DVRs.
2. **Our engineers remotely configure the Edge Agent** in under 30 minutes.
3. **Experience live centralized video**, predictive health telemetry, and AI alerts firsthand.
